Quarterly Data Quality Report (demo)

This is a synthetic document generated for testing Nydra. It contains no real data.

Summary: the order dataset had 3 percent missing values and a few duplicate rows. Cleaning removed the duplicates and filled gaps with median values.

Contact for questions: analyst@example.com, phone 555-0142.

Next steps: review outliers in the price column, then retrain the model and compare results with the previous quarter.

Metric	Before	After
Missing values	3.1%	0%
Duplicate rows	5	0
Outliers flagged	4	4
